In 2018 I have started showing interest in programming. Then, I decided to improve my programming skills with different online courses, like TeamTreeHouse, FreeCodeCamp, Udemy. In each course, I developed different sets of technical skills, such as HTML, CSS, JavaScript, jQuery, Bootstrap, etc. If you would like to see a more you can check my portfolio(web page) or check my GitHub profile. My current goals as a professional are to learn as much as possible about diverse technologies and to improve my programming skills and knowledge. At this stage of my journey, I would say that I have a good foundation. However, I believe I have a lot to learn. In my opinion, I am a quick learner with a good problem-solving mindset, anything thinking, and I am not afraid to dig deep into more complicated topics.

Authorized to work in the US for any employer
